

Marcin Lenartowski

I'm keeping focus on experience of users interact with websites, mobile & desktop apps. I'm sure of it that all visual design starts with graphic design. Design can be simple. That's why it's so complicated and fascinated for me. User interface and user experience are seemingly independent fields that provide the greatest satisfaction when experienced simultaneously with graphic design.

Specific needs of users, requires from me to be honest with each other and to be proud of what we are doing. For me, empathy is most important characteristics of design process, allowing to focus on user feelings.
